

Lanner Electronics Newsletter April 2024

Lanner Reveals Its Newest Rackmount Edge AI Computer  
Tailored for  
Rail Intelligence Solutions – EAI-R530

Lanner introduces the EAI-R530, a rackmount Edge AI computer meticulously designed for rail video analytics systems, driven by the powerful 13th Generation Intel® Core™ Processor. This state-of-the-art computing solution is bolstered with integrated AI accelerators like the Hailo-8™ AI accelerator, coupled with compatibility with NVIDIA MXM GPU cards, guaranteeing peak performance for AI-driven applications and workloads.

Featured Product

- 13th Generation Intel® Core™ Processor (Raptor Lake-P)
- Certified with EN50155 and EN45545 Standard
- Hailo-8™ AI Acceleration Module & NVIDIA MXM GPU Module Support
