## AI-Accelerated Computers Enable Multi-stream Video Analytics Solutions

AI video analytics is the process of leveraging artificial intelligence and machine learning algorithms to analyze and interpret video data. This allows for the automatic detection of objects, recognition of actions and behaviors, and generation of business intelligence that can be used to improve safety, security, and efficiency in a variety of applications.

Lanner offers a full range of AI-accelerated industrial computers that enable video analytics solutions in industrial settings. With embedded AI accelerators to process deep learning inferencing in real-time, these edge AI computers are designed to handle multiple streams of video simultaneously, detecting and analyzing a wide range of objects, faces, and actions in industrial environments.

Video Analytics

Traffic Management

Physical Security

Disaster Response

Critical Assets Protection

Queue Management

Smart Parking

## Featured Products

### EAI-I131

- NVIDIA® Jetson Orin NX/Nano
- AI Performance Up To 100 TOPS Up To 1024-core NVIDIA CUDA GPU With 32 Tensor Cores

### Falcon H8

- Support For 4, 5 Or 6 Hailo-8™ AI Processors
- Support For Up To 156 TOPS 8000FPS Of ResNet-50
- Support For Hailo-8 Software Development Tools

HAILO

## LEC-2290H

- Intel® Core i7-8700
- Falcon-H8 AI Accelerator Card With 6x Hailo-8™ AI Processors
- 2x DDR4 2133/2400 SO-DIMM, Max. 32GB
